# Davide Madrisan

Curriculum Vitæ et Studiorum<sup>(\*)</sup> — 21 September 2019

## Lead Infra DevOps and Automation Engineer

Linux Open Source Developer with 20 years of experience

*Starting with a degree in Applied Mathematics and a Doctorate of Musical Arts in Piano, and then moving on into Cisco WAN networking and network security, Linux distribution development, Linux administration and Nagios/Centreon monitoring in highly demanding production environments, Linux embedded systems, Web development, and Linux DevOps technologies, I think I have a wealth of background knowledge, maturity, and ability to learn to bring to any new challenge or opportunity.*

## Areas of Interest

I'm currently busy playing with SaltStack, Docker, Go, cloud technologies, and improving my knowledge in functional programming, but my interests in technology and maths/physics fields cover the following areas (somewhat ordered by decreasing degree of time occurred):

- DevOps, Infrastructure & Configuration as Code Technologies;
- Maths, currently digging around Logic and Computation Theory, Complex and Dynamic Systems, Chaos Theory, Fractals;
- Functional, concurrent, and Web programming (in Python, Go, Scala, Node.js);
- Cloud Computing Technologies, Microservices Architectures;
- Linux, Docker containers and Embedded Linux Systems.

An annotated scatter plot that should help visualizing my job and learning activities.

<sup>(\*)</sup> The online version of this Curriculum Vitæ is available at <https://github.com/madrisan/cv>

## ■ EXPERIENCES

**September 2017 – current**

**Lead Infra DevOps @ Qwant.com**

*Infra Lead DevOps* at Qwant (<https://www.qwant.com>), the French startup company that develops the eponymous web search engine that respects the users' privacy.

*main tasks* Software—define (*reasonably*) *everything* with *SaltStack*: from infrastructure to software integration, deployment, and testing. Develop some Salt state/execution/SDB modules, and runners for a better integration with GitLab CI, HashiCorp Vault HA (with HashiCorp Consul and Apache ZooKeeper as secure storage backends), phpIPAM, and for deploying virtual servers and Swarm clusters. Code the deployment of web services, databases, Debian apt repositories, and the software projects developed by the Qwant developers.

*software* <https://github.com/madrisan/hashicorp-vault-monitor> — HashiCorp Vault Monitoring Tool (written in Go);

<https://github.com/madrisan/debian-packages> — Debian Stretch Packages for Vault, Consul, py-zabbix, pyvmomi.

*technologies* Docker/Docker Compose, Git/GitLab/GitLab Runner, HAProxy, HashiCorp Vault and Consul, Jenkins, MariaDB, NGINX, phpIPAM, Phusion Passenger, SaltStack, Salt Cloud, Swarm, Unbound, uWSGI, ZooKeeper; Golang, Python languages; CentOS and Debian Linux.

**April 2013 – current**

**OS2—Open Source Solutions (micro entreprise)**

In parallel of my current job, I have decided to develop an additional professional activity as Auto Entrepreneur, mainly focused on Open Source and Linux-based (new) technologies:

- Web development (JavaScript/JQuery, MEAN Stack, Web Sites);
- Linux Embedded system, multimedia, Python and web development on RaspberryPi;
- LAN networking design and setup (Cisco, DELL, Synology NAS);
- Web services based on AWS Cloud Technologies.

**July 2014 – August 2017**

**Senior DevOps and Linux Engineer at Sopra Steria**

I joined Sopra Steria group as a L3 consulting Linux administrator and DevOps on several Red Hat based new projects.

*main tasks* Lead the switch to *SaltStack* as primary tool for IT automation and system configuration management, built from scratch. Build, validate and improve *High Availability* solutions, for hosting web applications and Oracle databases, by using the *Red Hat cluster suite* (cman, pacemaker/corosync).

*software* <https://github.com/madrisan/pyoocs> — an open source framework (back—end in Python and JSON, front—end in Bootstrap and AngularJS) for ensuring the quality of the build process and report a list of deviations from the company policies.

<https://github.com/madrisan/pyxymon> — improve the Xymon monitoring by developing new checks and fixing the existing ones.

Develop some scripts for building and packaging the infrastructure software into dynamically created Docker containers, one per supported platform. Develop a Python inventory tool for Linux using SaltStack as backend.

*technologies* Linux RHEL/CentOS/Debian, Red Hat Cluster Suite, Docker containers, AWS services, VMware. Git/GitHub/GitLab, Travis CI. SaltStack and Spacewalk. Shell and Python scripting languages, RWD (Bootstrap, CSS3, HTML5, AngularJS).

## October 2011 – June 2014 Monitoring Architect and Team Leader at IBM

L3 Nagios and Centreon administrator and developer. *Technical Leader* of the *Nagios monitoring team* (France and Poland). *Focal point* of the monitoring technologies based on open source solutions and software. This work at IBM France has given me the opportunity to setup new solutions for monitoring operating systems, databases, applications, and network appliances by using a wide range of opensource technologies.

*main tasks* New project management (architecture, transition, planning, realization, and support). Design, implement, validate, and document new monitoring solutions, by cooperating with architects, managers, system, database, and application administrators.

Administer all the monitoring configuration (5k+ hosts; 60k+ monitored services), improve the security of the core and Nagios servers, apache services and applications.

Create rpm packages and administer the yum repositories containing the monitoring and system software (250+ source rpm packages and 2000 packages created from scratch).

*technologies* *Operating Systems:* AIX, HP-UX, Linux, Solaris, VMware ESX/ESXi, Windows;

*Databases:* DB2, MySQL, MS SQL, Oracle, PostgreSQL;

*Network and IT security appliances:* Linux, Cisco, BalaBit Log Management, QRadar;

*Languages:* bash, C, Perl, Python, HTPL, and PHP.

*software* <https://github.com/madrisan/nagios-plugins-linux> — extend the *Nagios Plugins* official software for monitoring Linux hosts and Docker containers.

Develop shell, Python scripts, and C (system level) programs. Porting some of these C plugins to other Unixes (AIX, FreeBSD, OpenBSD, Solaris, SunOS openindiana).

## November 2008 – September 2011 L3 Senior Linux Sysadmin at IBM

During my work at IBM SSO in France, I was assigned on multiple client Linux support. My experiences at IBM helped me to add *management*, *compliance* changes and incidents management in a very strict *ITIL* and *GDF* environment) and *process skills* to my profile.

Volunteer member of the IBM *Center of Excellence Linux*, working on solutions of standardization and validation of new technologies for Linux inside IBM France and for improving the quality of the delivery.

Development of yum repositories containing all the software written by the team and myself, most of them for Nagios/Centreon monitoring purposes.

*technologies* RHEL (Red Hat) and SLES (SuSE) physical and virtual servers (VMWare, HyperV), Red Hat and Linux HA (heartbeat and DRBD) clusters, IBM servers and IBM blades, Boot On San, VMware ESX management, Yum and RPM packaging. Bash, Python, PHP, and C development languages.

## July 2008 – Septembre 2008 C/C++ development on Linux mobile at OpenPlug

Porting of several MSDN library functions and win32 code, libraries and tools developed under Microsoft Visual C/C++, to the Moblin environment, an open source Linux-based operating system and application stack for Mobile Internet Devices, netbooks, nettops and embedded devices.

## January 2007 – May 2008 Linux and VMware Certified Engineer at IBM

Senior Linux system administrator and VMware certified engineer at IBM Turin.

## September 2003 – December 2006 **Linux System Development at QiNet S.r.l.**

Developer of the ‘*QiLinux*’ GNU/Linux distribution for *i586* and *ppc* architectures, the first Italian distribution *created from scratch*.

April 2006 – December 2006 (9 months). *Leader of the team* that developed QiLinux 2.0, the derived commercial products ‘*Tuga Desktop*’, and the educational live CD ‘*QiLinux Docet*’ and ‘*Qiko Junior*’.

Between 2003 and 2006 I had an experience as a *Linux distribution developer* which involved me into many different activities ranging from the conception and creation from sources of all the pieces and technologies of a modern Linux distribution to the development and debugging in the Linux environment and the compliance with the available standards.

*main tasks* Creation and updates of all the *specfiles* shipped by the QiLinux project as a base for build the software for all the supported architectures. *Integration* in QiLinux of all the available Linux desktop and server technologies.

Products *quality*, *usability* analysis, *bug fixing*, and conformance to the LSB standards. Patching of the security issues and public release of the ‘*QiLinux Security Advisories*’. Creation of the final ISO images of the opensource and commercial products.

Installation and support of QiLinux boxes.

<https://gitlab.mambasoft.it/openmamba/autospec> — development of the *autospec* and *libspec* software for speed up the packages update, and make it possible the continuous integration and testing of the new software in the mainstream distribution.

Development of the C software what was responsible for the creation of the packages dependency chart and the PHP pages in the QiLinux web portal.

*technologies* All the Linux technologies ranging from the Linux kernel plus user-space related software to the system tools, the local, printing, and network services up to the development and desktop environments.

## March 2003 – August 2003 **Cisco Network Specialist at Intesa Sanpaolo**

Working as a Cisco LAN/WAN network administrator expert in one of the most important banks of Italy.

## October 2001 – January 2003 **Cisco Network Expert Engineer at Atlanet**

Cisco Engineer at Atlanet (FIAT’s TLC venture now part of the BT Telecom group), working in a highly business and production critical environment.

Development of a fully featured software for generating Cisco router configurations from a minimal set of specifications given by a network architect to speed up and reduce the alea of the complex network migrations to the MPLS network cloud topology.

## October 1999 – September 2001 **Cisco Network Engineer at Fiat GlobalValue**

Working either on-site or remotely for different Italian customers (Fiat ITS and GlobalValue, Sanpaolo, Miroglio Tessile) to develop, troubleshoot and manage their Cisco WAN networks.

Develop small network related scripts for calculating IP parameters and doing SNMP queries on routers not accessible by our team.

## October 1998 – February 1999 **T<sub>E</sub>X development at Academy of Sciences**

Development of a collection of T<sub>E</sub>X macros and document styles written in pure *plain*T<sub>E</sub>X for the *Royal Academy of Sciences of Turin*.

Source code: <https://github.com/madrison/TeX-macros/tree/master/astmacro>

The aim of this project was to develop a document style, using the *plain*T<sub>E</sub>X language, to easily write Mathematics and Physics papers by emulating the Microsoft Word Look&Feel. The most difficult part was implementing a complete support for the TrueType fonts, not natively available under *plain*T<sub>E</sub>X.

## ■ LANGUAGES

- *Italian*: Native language
- *French*: Bilingual proficiency
- *English*: Professional working proficiency

## ■ EDUCATION

**September 2014 – Coursera, edX, Udacity, FUN, Complexity Explorer MOOCs**

Lifelong learning for professional development and fun: nearly 60 MOOCs completed, mainly on Data Science, Cloud Computing, and parallel/generic/functional/web programming.

**October 1994 – July 1999**

**Università degli Studi di Torino**

Master's degree in Applied Science, Mathematics and Computer Science.

**September 1982 – June 1993**

**Conservatorio di Musica G. Verdi, Torino**

Doctor of Musical Arts in Piano.

## ■ CERTIFICATIONS & COURSES

2016 – Full Stack Web Development Specialization – *The Hong Kong University*.

2016 – Paradigms of Computer Programming – *Université catholique de Louvain*.

2015 – Big Data XSeries Certificate – *Berkeley University & Databricks*.

2007 – VMware Certified Professional on VI3 (VCP310).

2003 – VPN-1/Firewall-1 Management II NG.

2003 – ZyXEL Certified Network Engineer.

2002 – CSPFA (Cisco Secure PIX Firewall Advanced).

2001 – BSCN (Building Scalable Cisco Networks).

2000 – CLSC (Cisco LAN Switch Configuration) Certified.

### **BIG DATA and MACHINE LEARNING**

*The Johns Hopkins University*

Data Science Specialization

- The Data Scientists Toolbox
- R Programming
- Getting and Cleaning Data
- Exploratory Data Analysis
- Reproducible Research

*Berkeley University & Databricks*

Big Data XSeries

- Introduction to Big Data with Apache Spark
- Scalable Machine Learning

*Université de Strasbourg on FUN* – Stochastic Evolutionary Optimization

*Stanford University on Coursera* – Machine Learning

*Microsoft on edX* – Introduction to R

*Harvard University on edX* – Statistics and R for Life Sciences

### **BUSINESS**

*Ludwig-Maximilians Universität München on Coursera* – Competitive Strategy

### **CLOUD COMPUTING and DEVOPS**

*University of Illinois at Urbana-Champaign*

- Cloud Computing Applications

- Cloud Networking

*AWS Training on Amazon Web Services* – AWS Technical Essentials (version August 2016)

*Linux Foundation*

- LFS132.x Introduction to Cloud Foundry and Cloud Native Software Architecture
- LFS151.x Introduction to Cloud Infrastructure Technologies
- LFS152.x Introduction to OpenStack
- LFS158.x Introduction to Kubernetes
- LFS161.x Introduction to DevOps: Transforming and Improving Operations

*Red Hat on edX* – DO081x Fundamentals of Containers, Kubernetes, and Red Hat OpenShift

## **MATHEMATICS**

*Santa Fe Institute*

- Introduction to Dynamical Systems and Chaos
- Fractals and Scaling
- Introduction to Renormalization
- Introduction to Computation Theory

## **PROGRAMMING**

*University of Illinois at Urbana-Champaign on Coursera* – Heterogeneous Parallel Programming

*École Polytechnique Fédérale de Lausanne*

- Introduction à la programmation orientée objet en C++
- Functional Programming Principles in Scala

*Universidad Carlos III de Madrid on edX* – Introduction to Programming with Java (part 1)

*The Hong Kong University of Science and Technology*

- Introduction to Java Programming (part 2)

*Université catholique de Louvain*

- Paradigms of Computer Programming – Fundamentals
- Abstraction and Concurrency

*University of Michigan on Coursera* – Using Python to Access Web Data

## **WEB PROGRAMMING**

*W3C on edX* – Learn HTML5 from W3C

*University of London*

- Responsive Website Basics: Code with HTML, CSS, and JavaScript

*University of Michigan*

- Introduction to HTML5
- Advanced Styling with Responsive Design

*The Hong Kong University of Science*

Full Stack Web Development Specialization

- HTML, CSS and JavaScript
- Front-End Web UI Frameworks and Tools
- Front-End JavaScript Frameworks: AngularJS
- Multiplatform Mobile App Development with Web Technologies
- Server-side Development with NodeJS
- Full Stack Web Development Specialization Capstone Project

*Pluralsight on Code School* – Shaping up with Angular.js

*Microsoft*

- Introduction to JQuery
- Introduction to TypeScript

*MongoDB*

- M101JS: MongoDB for Node.js Developers
- M101x: Introduction to MongoDB using the MEAN Stack

*at&T, Google, GitHub, Hack Reactor*

Front-End Web Developer Nanodegree

- Intro to AJAX
- JavaScript Basics
- JavaScript Design Patterns
- JavaScript Testing
- Object-Oriented JavaScript

**OTHER DOMAINS**

*University of California, san Diego*

- How to Learn: powerful mental tools to help you master tough subjects
